

# REFLECTION ACTIVITY

Of the values we discussed (aesthetic, cultural, ecological, economic, educational, or recreational), which are most important to you when you think of parks and green spaces? Give specific examples of how you use green spaces that back up your answer.

---

---

---

Think about the influences in your life (parents, friends, school, church, television, etc.). How have these affected what you think about green spaces and how you value them?

---

---

---

Why should people value green spaces? Write an ad, song, poem, rap or commercial incorporating information from at least four categories. One must be economic benefits. One must be ecological benefits. You may choose the other two.
